

HPE SimpliVity

# 380 Gen10 H (SFF)

## Your personalised recommendation

The HPE SimpliVity 380 Gen 10 H (SFF) has been recommended as the perfect match for your business's IT infrastructure needs.

So to give you an introduction to this hyperconverged, hyperflexible, hyperintelligent infrastructure, we've created a simple guide to the key benefits.

## HPE SimpliVity: Simplified

HPE SimpliVity is the most efficient all-in-one HCI you can get.

With enterprise-grade data services and security built in, simple, centralised management, and predictive analytics that solve problems before they happen, downtime becomes a thing of the past.

**69%** cost savings vs traditional infrastructure

**10:1** data efficiency guaranteed across storage and backup

**90%** capacity savings, guaranteed

**50%** lower costs per remote desktop

## Key facts

- Hybrid storage
- Ideal for high-capacity mixed workloads and general purpose virtualisation
- Up to 3TB memory
- 20TB usable capacity (before deduplication and compression)
- 2U1N, 1-2P form factor
- Storage configuration: 4 x 1.92TB SSD and 20 x 1.2TB HDD
